Group Report

Team Member:
1) Mingzhao Chen   mchen135@binghamton.edu
2) Jing Zhu   jzhu76@binghamton.edu
3) Manish Kumar   mkumar7@binghamton.edu

Division of work:
1) Mingzhao: He mainly focus on the JDBC and GUI part, and modifies all the sequences, triggers and package to make them can be used by our jdbc program and GUI interface.
2) Jing: She mainly focus on question 1, 6, 7, 9.
3) Manish: He mainly focus on question 2, 3, 4, 5,8.
4) Some of Jing's and Manish's codes that we don't used are in "others" folder.

Experience:
This project, we are asked to write many small PL/SQL program. We found that it is easy to firstly write the SQL queries and test them in database, and then modify them to can be used in PL program.

This project need java programming, but none of us is familiarly with Java programing as well as GUI or wed interface. So, we just make full use of what I have known, to finish this project. For example, Mingzhao know how to build a IOS app, so he decides to implement a Mac OS interface instead of using java interface or wed server. But mix programing with objective-c and java is also difficult, we must use shell script to combine two programming language.

Meeting:
We meet 5 to 10 minutes after each class.
